

IBASEC3 - Services and Support

About Services and Support offered by Keyon

Keyon is a leading provider of services and solutions in the areas of IT security, software engineering, IT risk and compliance management.

In the IBASEC3 project, Keyon had a leadership role in the technical and organizational implementation of the security related IBASEC3 processes.

Keyon was responsible for the implementation of the IBASEC3 related security functionality in conjunction with the Luna SP hardware security module (HSM). As SafeNet's premium partner Keyon is also responsible for the technical and logistical services in connection with the rollout of and support for the hardware components used in the IBASEC3 project.

Take a look at our german Flyer [Perlen der Sicherheit](#) to get more information about the partnership between Keyon and SafeNet.
